Nathaly Herrera

SOFTWARE ENGINEER | NYC

ABOUT ME:

I am a dependable professional with six years of experience in a high-pressure environment. I've dedicated the past year to learning Software Development and I'm driven to start a new career in this industry due to the flexibility and continuous learning. A few of my personal goals entail traveling and learning about different cultures and gaining new skills. I consider myself to be patient and tactful when dealing with difficult tasks. I am supportive and communicate well when working in groups.

TECHNICAL SKILLS:

HTML	Express
CSS	Heroku
JavaScript	MongoDB
React	Git & GitHub
Node.js	Figma

PROJECTS:

Disney Mania! - A front-end JS app that allows you to search for random Disney tv shows & movies. This app is pulling data from two API's and rendering that data in its respective section. This site is fully responsive.

Gettin' Quizzy Wit It - A react app that provides 90's themed quizzes. This app pulls data from a self-built Airtable API. This site is responsive and allows the user to take multiple quizzes as well as add questions to any of the quizzes to extend the data.

RNLH - A full-stack react app that is a luxury marketplace. This site allows the users the ability to shop for products. This site has a sign in feature to further personalize the user experience and allows signed in users the ability to add products to sell, edit product details, and delete products. This was a group project.

PROFESSIONAL EXPERIENCE:

SOFTWARE ENGINEERING IMMERSIVE | ENGINEERING FELLOW
